We are at a crossroads in medicines research. In the next decade, systems biology research will yield an unprecedented wealth of novel insights in the mechanisms of disease.

This will revolutionise medicines research, leading to the introduction of novel therapeutic interventions which modify and, it is hoped, cure the disease, rather than providing symptom relief. At the same time, health systems around the globe are exploring new ways to deliver innovative treatment solutions to patients in a sustainable manner.

PSWC 2017 will provide scientists from all over the world with a place to meet and network with key leaders from the pharmaceutical industry, government agencies, regulatory bodies, academia and public-private partnerships.

You can listen to, interact with and share the latest research findings in plenary sessions, keynote lectures, short oral sessions, poster sessions and short courses.
